About the FDP

Today's society is becoming more and more dependent on open networks such as the Internet, where commercial activities, business transactions and government services are concentrated leading to the intensification of network threats and numerous information security issues which are continually refined by cyber criminals in new & sophisticated ways. The inability to provide trusted security services in contemporary computer network technologies has a tremendous socio-economic impact on global enterprises as well as individuals. Hence, raising awareness and understanding on the issues involved in network and information security is of supreme concern. The FDP also aims at providing a forum for members of the research and academic community, to interact on cutting-edge and ground breaking topics in Mobile, Internet, Networking, Information Security, Computer Forensics etc.
